DRIVER'S HOURS OF SERVICE & AUDITING LOGBOOKS & TIME RECORDS

Under the state and federal hours-of-service rules, failure to complete the record of duty status (driver's daily log), failure to preserve the record, or making false reports on the record is illegal, making both the driver and his/her carrier liable for prosecution. The best way to make sure logs are being kept properly is by performing a regular audit of drivers' logs.

This training program will cover the basics of efficiently and effectively auditing logs for drivers of property-carrying commercial motor vehicles.

Who should attend?: Drivers, owner-operators, managers, supervisors, safety directors and dispatchers.

HOW TO COMPLETE VEHICLE PRE-TRIP INSPECTIONS and POST-TRIP REPORTS

This seminar will show your drivers - step by step, part by part - how to inspect their vehicles. Proper vehicle inspections can reduce the chances of accidents and breakdowns ... and their resulting costs. This training will convince your drivers that inspections need to be done before and after every trip ... and will show them the proper procedures.

Makes a strong case for vehicle inspections by reminding drivers that they and their company suffer from accidents and breakdowns. Walks drivers through a seven-step inspection process from the engine to the cab to the brakes. Reminds drivers of applicable DOT regulations. It stresses the importance of checking things in the same order every time to reduce the chance of forgetting something, and reminds drivers to fill out the DVIR each time, as well.
